Journal of Inorganic Biochemistry 80 (2000) 293–297

JOURNAL OF Inorganic Biochemistry

Subject Index of Volume 80

Ab initio calculations
models for the active site of vanadium-dependent haloperoxidases: insight into the solution structure of peroxo vanadium compounds, 41
Alcohols
vanadium catalyzed reduction of dioxygen to hydrogen peroxide: an oscillating process, 191
Alkyne complexes
vanadium nitrogenase, 133
Amavadin
investigations of Amavadin, 17
Amide
toward model complexes of Co-containing nitrile hydratases: synthesis, complete characterization and reactivity toward ligands such as CN^- and NO of the first square planar Co^{III} complex with two different carboxamido nitrogens and two thiolato sulfur donors, 239
Antidiabetic vanadyl complex
an orally active antidiabetic vanadyl complex, bis(1-oxy-2-pyridinethiolato)oxovanadium(IV), with $VO(S_2O_2)$ coordination mode; in vitro and in vivo evaluations in rats, 99
Aqua-vanadium complexes
water and bromide in the active center of vanadate-dependent haloperoxidases, 115
Asphaltene
the vanadium isotopic constitution of petroleum asphaltenes: La Luna Formation (Venezuela), 153
Aspirin
synthesis, characterization and bioactivity of a new VO^{2+} /Aspirin complex, 169
2,2′-Azino-bis(3-ethylbenzthiazoline-6-sulfonic acid)
oxidation reactions catalyzed by vanadium chloroperoxidase from *Curvularia inaequalis*, 91

.Bioactivity
synthesis, characterization and bioactivity of a new VO^{2+} /Aspirin complex, 169
Biomimetic oxidation
first success of catalytic epoxidation of olefins by an electron-rich iron(III) porphyrin complex and H_2O_2: imidazole effect on the activation of H_2O_2 by iron porphyrin complexes in aprotic solvent, 219
Bis(1-oxy-pyridinethiolato)oxovanadium(IV)
an orally active antidiabetic vanadyl complex, bis(1-oxy-2-pyridinethiolato)oxovanadium(IV), with $VO(S_2O_2)$ coordination mode; in vitro and in vivo evaluations in rats, 99
Blood serum
speciation of insulin-mimetic VO(IV)-containing drugs in blood serum, 65
Bromine K-edge EXAFS
water and bromide in the active center of vanadate-dependent haloperoxidases, 115
Bromoperoxidase
a ^{17}O NMR study of peroxide binding to the active centre of bromoperoxidase from *Ascophyllum nodosum*, 157

Ca^{2+} translocation
vanadate oligomer inhibition of passive and active Ca^{2+} translocation by the Ca^{2+} pump of sarcoplasmic reticulum, 145
CD45
hydroxamido vanadates: aqueous chemistry and function in protein tyrosine phosphatases and cell cultures, 11
Chemical shift calculations
density-functional study of vanadate-glycylserine isomers, 137
Chirality
investigations of Amavadin, 17
Chloroperoxidase
oxidation reactions catalyzed by vanadium chloroperoxidase from *Curvularia inaequalis*, 91
Cobalt
toward model complexes of Co-containing nitrile hydratases: synthesis, complete characterization and reactivity toward ligands such as CN^- and NO of the first square planar Co^{III} complex with two different carboxamido nitrogens and two thiolato sulfur donors, 239
Coordinated cysteine
an MCD spectroscopic study of the molybdenum active site in sulfite oxidase: insight into the role of coordinated cysteine, 227
Corroles
first syntheses and X-ray structures of a *meso*-alkyl-substituted corrole and its Ga(III) complex, 235
Cryoreduction
EPR evidence of two structurally different diferric sites in *Mycobacterium tuberculosis* R2-2 ribonucleotide reductase protein, 213
Crystal structure(s)
stereospecific formation of α-hydroxycarboxylato oxo peroxo complexes of vanadium(V). Crystal structure of $(NBu_4)_2[V_2O_2(O_2)_2$-(L-lact)$_2]\cdot 2H_2O$ and $(NBu_4)_2[V_2O_2(O_2)_2$(D-lact) (L-lact)$\cdot 2H_2O$, 59
toward model complexes of Co-containing nitrile hydratases: synthesis, complete characterization and reactivity toward ligands such as CN^- and NO of the first square planar Co^{III} complex with two different carboxamido nitrogens and two thiolato sulfur donors, 239
Cysteine
insulin mimesis of vanadium derivativres. Oxidation of cysteine by V(V) oxo diperoxo complexes, 173
Cytochrome oxidase
O–O bond splitting mechanism in cytochrome oxidase, 261

Density-functional theory
density-functional study of vanadate-glycylserine isomers, 137

Elsevier Science S.A.

Diabetes
chemistry and insulin-like properties of vanadium(IV) and vanadium(V) compounds, 123
1,2-Dimethyl-3-hydroxy-4-pyridinone
structural study of the interaction of vanadate with the ligand 1,2-dimethyl-3-hydroxy-4-pyridinone (Hdmpp) in aqueous solution, 177
Dinitrogen complexes
vanadium nitrogenase, 133
Dioxygen activation
vanadium catalyzed reduction of dioxygen to hydrogen peroxide: an oscillating process, 191
Dipeptide complexes
specitation in the vanadate–alanylhistidine–peroxide system, 149

Eight co-ordination
investigations of Amavadin, 17
Electron nuclear double resonance
oxo-vanadium as a spin probe for the investigation of the metal coordination environment of imidazole glycerol phosphate dehydratase, 161
Electron paramagnetic resonance
oxo-vanadium as a spin probe for the investigation of the metal coordination environment of imidazole glycerol phosphate dehydratase, 161
EPR evidence of two structurally different diferric sites in *Mycobacterium tuberculosis* R2-2 ribonucleotide reductase protein, 213
activities and relative affinities of divalent metals in unmodified and phosphorothioate-substituted hammerhead ribozymes, 271
Electron paramagnetic resonance spectra
oxovanadium(IV) complexes with aromatic aldehydes, 35
Electron paramagnetic resonance spectroscopy
vanadyl(IV) binding to mammalian ferritins. An EPR study aided by site-directed mutagenesis, 107
Electron spin echo envelope modulation
oxo-vanadium as a spin probe for the investigation of the metal coordination environment of imidazole glycerol phosphate dehydratase, 161
Enantioselective oxidation
biocatalytic and biomimetic oxidations with vanadium, 81
Epoxidations
first success of catalytic epoxidation of olefins by an electron-rich iron(III) porphyrin complex and H_2O_2: imidazole effect on the activation of H_2O_2 by iron porphyrin complexes in aprotic solvent, 219

Fe protein
the role of the MoFe protein α-125^{Phe} and β-125^{Phe} residues in *Azotobacter vinelandii* MoFe protein–Fe protein interaction, 195
Ferritin
vanadyl(IV) binding to mammalian ferritins. An EPR study aided by site-directed mutagenesis, 107
Fourier transform infrared spectrometry
the presence of a SO molecule in [NiFe] hydrogenase from *Desulfovibrio vulgaris* Miyazaki as detected by mass spectrometry, 205

Gallium complex
first syntheses and X-ray structures of a *meso*-alkyl-substituted corrole and its Ga(III) complex, 235
Glutamine
mutational and spectroscopic studies of the significance of the active site glutamine to metal ion specificity in superoxide dismutase, 247

Haloperoxidases
models for the active site of vanadium-dependent haloperoxidases: insight into the solution structure of peroxo vanadium compounds, 41
water and bromide in the active center of vanadate-dependent haloperoxidases, 115
Hammerhead
activities and relative affinities of divalent metals in unmodified and phosphorothioate-substituted hammerhead ribozymes, 271
Hybrid density functional theory
O–O bond splitting mechanism in cytochrome oxidase, 261
Hydrogenase
the presence of a SO molecule in [NiFe] hydrogenase from *Desulfovibrio vulgaris* Miyazaki as detected by mass spectrometry, 205
Hydrogen peroxide
first success of catalytic epoxidation of olefins by an electron-rich iron(III) porphyrin complex and H_2O_2: imidazole effect on the activation of H_2O_2 by iron porphyrin complexes in aprotic solvent, 219
Hydroperoxide
a ^{17}O NMR study of peroxide binding to the active centre of bromoperoxidase from *Ascophyllum nodosum*, 157
α-Hydroxycarboxylatodioxovanadates(V)
stereospecific formation of α-hydroxycarboxylato oxo peroxo complexes of vanadium(V). Crystal structure of $(NBu_4)_2[V_2O_2(O_2)_2$-(L-lact)$_2]\cdot 2H_2O$ and $(NBu_4)_2[V_2O_2(O_2)_2$(D-lact) (L-lact)$\cdot 2H_2O$, 59
α-Hydroxycarboxylatooxoperoxovanadates
stereospecific formation of α-hydroxycarboxylato oxo peroxo complexes of vanadium(V). Crystal structure of $(NBu_4)_2[V_2O_2(O_2)_2$-(L-lact)$_2]\cdot 2H_2O$ and $(NBu_4)_2[V_2O_2(O_2)_2$(D-lact) (L-lact)$\cdot 2H_2O$, 59
Hydroxylamine
hydroxamido vanadates: aqueous chemistry and function in protein tyrosine phosphatases and cell cultures, 11
Hydroxyl side chain
towards models of vanadate-dependent haloperoxidases: the hydroxyl side chain, 185

Imidazole
speciation in vanadium bioinorganic systems. 6. Speciation study of aqueous peroxovanadates, including complexes with imidazole, 51
Imidazole glycerol phosphate dehydratase
oxo-vanadium as a spin probe for the investigation of the metal coordination environment of imidazole glycerol phosphate dehydratase, 161
Insulin-like
chemistry and insulin-like properties of vanadium(IV) and vanadium(V) compounds, 123
Insulin-like effects
insulin-like effects of vanadium: basic and clinical implications, 21
Insulin-mimetic VO(IV)
speciation of insulin-mimetic VO(IV)-containing drugs in blood serum, 65
Iron porphyrins
first success of catalytic epoxidation of olefins by an electron-rich iron(III) porphyrin complex and H_2O_2: imidazole effect on the activation of H_2O_2 by iron porphyrin complexes in aprotic solvent, 219
Isocyanide complexes
vanadium nitrogenase, 133
Isotope
the vanadium isotopic constitution of petroleum asphaltenes: La Luna Formation (Venezuela), 153

Kinetics
arginine 56 mutation in the β subunit of nitrile hydratase: importance of hydrogen bonding to the non-heme iron center, 283

LAR
hydroxamido vanadates: aqueous chemistry and function in protein tyrosine phosphatases and cell cultures, 11

Mass spectrometry
models for the active site of vanadium-dependent haloperoxidases: insight into the solution structure of peroxo vanadium compounds, 41
the presence of a SO molecule in [NiFe] hydrogenase from *Desulfovibrio vulgaris* Miyazaki as detected by mass spectrometry, 205
MCD spectroscopic study
an MCD spectroscopic study of the molybdenum active site in sulfite oxidase: insight into the role of coordinated cysteine, 227
Meso-alkyl-substituted corrole
first syntheses and X-ray structures of a *meso*-alkyl-substituted corrole and its Ga(III) complex, 235
Metal accumulation
investigations of Amavadin, 17
Metal ion specificity
mutational and spectroscopic studies of the significance of the active site glutamine to metal ion specificity in superoxide dismutase, 247
Metals
activities and relative affinities of divalent metals in unmodified and phosphorothioate-substituted hammerhead ribozymes, 271
Mixed-valent state
EPR evidence of two structurally different diferric sites in *Mycobacterium tuberculosis* R2-2 ribonucleotide reductase protein, 213
Model compounds
oxovanadium(IV) and oxovanadium(V) complexes relevant to biological systems, 1
Models
towards models of vanadate-dependent haloperoxidases: the hydroxyl side chain, 185
MoFe protein
the role of the MoFe protein α-125^{Phe} and β-125^{Phe} residues in *Azotobacter vinelandii* MoFe protein–Fe protein interaction, 195
Molybdenum active site
an MCD spectroscopic study of the molybdenum active site in sulfite oxidase: insight into the role of coordinated cysteine, 227
Myosin
vanadate oligmer interactions with myosin, 141
N-Salicylidenehydrazides as versatile tridentate ligands for dioxovanadium(V) complexes, 181

Ni–Fe active site
the presence of a SO molecule in [NiFe] hydrogenase from *Desulfovibrio vulgaris* Miyazaki as detected by mass spectrometry, 205
Nitrile hydratase
toward model complexes of Co-containing nitrile hydratases: synthesis, complete characterization and reactivity toward ligands such as CN^- and NO of the first square planar Co^{III} complex with two different carboxamido nitrogens and two thiolato sulfur donors, 239
Nitrogen oxide
toward model complexes of Co-containing nitrile hydratases: synthesis, complete characterization and reactivity toward ligands such as CN^- and NO of the first square planar Co^{III} complex with two different carboxamido nitrogens and two thiolato sulfur donors, 239
Nitrogenase
the role of the MoFe protein α-125^{Phe} and β-125^{Phe} residues in *Azotobacter vinelandii* MoFe protein–Fe protein interaction, 195
Non-heme iron
arginine 56 mutation in the β subunit of nitrile hydratase: importance of hydrogen bonding to the non-heme iron center, 283

^{17}O NMR
a ^{17}O NMR study of peroxide binding to the active centre of bromoperoxidase from *Ascophyllum nodosum*, 157
O–O activation
first success of catalytic epoxidation of olefins by an electron-rich iron(III) porphyrin complex and H_2O_2: imidazole effect on the activation of H_2O_2 by iron porphyrin complexes in aprotic solvent, 219
O–O bond splitting
O–O bond splitting mechanism in cytochrome oxidase, 261
Oscillating reaction
vanadium catalyzed reduction of dioxygen to hydrogen peroxide: an oscillating process, 191
Oxidation
oxidation reactions catalyzed by vanadium chloroperoxidase from *Curvularia inaequalis*, 91
Oxidation kinetics
insulin mimesis of vanadium derivativres. Oxidation of cysteine by V(V) oxo diperoxo complexes, 173
Oxo-bridged vanadium$^{IV/V}$ complexes
synthesis and aqueous solution properties of multinuclear oxo-bridged vanadium (IV/V) complexes, 75
Oxo complexes
N-Salicylidenehydrazides as versatile tridentate ligands for dioxovanadium(V) complexes, 181
Oxovanadium(IV)
oxovanadium(IV) and oxovanadium(V) complexes relevant to biological systems, 1
Oxovanadium(IV) complexes
oxovanadium(IV) complexes with aromatic aldehydes, 35
Oxovanadium(V)
oxovanadium(IV) and oxovanadium(V) complexes relevant to biological systems, 1

Peptide complex
density-functional study of vanadate-glycylserine isomers, 137
Peroxo complex(es)
models for the active site of vanadium-dependent haloperoxidases: insight into the solution structure of peroxo vanadium compounds, 41
vanadium catalyzed reduction of dioxygen to hydrogen peroxide: an oscillating process, 191
Peroxovanadate
speciation in vanadium bioinorganic systems. 6. Speciation study of aqueous peroxovanadates, including complexes with imidazole, 51
Peroxovanadium
a ^{17}O NMR study of peroxide binding to the active centre of bromoperoxidase from *Ascophyllum nodosum*, 157
Peroxovanadium complexes
specitation in the vanadate–alanylhistidine–peroxide system, 149
Petroleum
the vanadium isotopic constitution of petroleum asphaltenes: La Luna Formation (Venezuela), 153
Porphyrin
binding of octa-plus porphyrazines to DNA, 257

Post-translational modification
arginine 56 mutation in the β subunit of nitrile hydratase: importance of hydrogen bonding to the non-heme iron center, 283
Protein tyrosine phosphatase
hydroxamido vanadates: aqueous chemistry and function in protein tyrosine phosphatases and cell cultures, 11
PTP1B
hydroxamido vanadates: aqueous chemistry and function in protein tyrosine phosphatases and cell cultures, 11

Redox potential
mutational and spectroscopic studies of the significance of the active site glutamine to metal ion specificity in superoxide dismutase, 247
Redox reactions
redox reactions via vanadium-induced electron transfer, 27
Ribonucleotide reductase
EPR evidence of two structurally different diferric sites in *Mycobacterium tuberculosis* R2-2 ribonucleotide reductase protein, 213
Ribozyme
activities and relative affinities of divalent metals in unmodified and phosphorothioate-substituted hammerhead ribozymes, 271
RNA
activities and relative affinities of divalent metals in unmodified and phosphorothioate-substituted hammerhead ribozymes, 271

Salicyladehyde
oxovanadium(IV) complexes with aromatic aldehydes, 35
Salicylidenehydrazide ligands
N-Salicylidenehydrazides as versatile tridentate ligands for dioxovanadium(V) complexes, 181
Sarcoplasmic reticulum
vanadate oligomer inhibition of passive and active Ca^{2+} translocation by the Ca^{2+} pump of sarcoplasmic reticululm, 145
Schiff base ligands
N-Salicylidenehydrazides as versatile tridentate ligands for dioxovanadium(V) complexes, 181
Semi-synthetic vanadium peroxidases
biocatalytic and biomimetic oxidations with vanadium, 81
Site-directed mutagenesis
vanadyl(IV) binding to mammalian ferritins. An EPR study aided by site-directed mutagenesis, 107
the role of the MoFe protein α-125^{Phe} and β-125^{Phe} residues in *Azotobacter vinelandii* MoFe protein–Fe protein interaction, 195
arginine 56 mutation in the β subunit of nitrile hydratase: importance of hydrogen bonding to the non-heme iron center, 283
Solution characterization
chemistry and insulin-like properties of vanadium(IV) and vanadium(V) compounds, 123
Speciation
speciation in vanadium bioinorganic systems. 6. Speciation study of aqueous peroxovanadates, including complexes with imidazole, 51
Stacking
binding of octa-plus porphyrazines to DNA, 257
Sulfenic acid
arginine 56 mutation in the β subunit of nitrile hydratase: importance of hydrogen bonding to the non-heme iron center, 283
Sulfinic acid
arginine 56 mutation in the β subunit of nitrile hydratase: importance of hydrogen bonding to the non-heme iron center, 283

Sulfite oxidase
an MCD spectroscopic study of the molybdenum active site in sulfite oxidase: insight into the role of coordinated cysteine, 227
Sulfur oxide
the presence of a SO molecule in [NiFe] hydrogenase from *Desulfovibrio vulgaris* Miyazaki as detected by mass spectrometry, 205
Superoxide dismutase
mutational and spectroscopic studies of the significance of the active site glutamine to metal ion specificity in superoxide dismutase, 247

Thiolate
toward model complexes of Co-containing nitrile hydratases: synthesis, complete characterization and reactivity toward ligands such as CN^- and NO of the first square planar Co^{III} complex with two different carboxamido nitrogens and two thiolato sulfur donors, 239

^{51}V
density-functional study of vanadate-glycylserine isomers, 137
^{51}V NMR
speciation in vanadium bioinorganic systems. 6. Speciation study of aqueous peroxovanadates, including complexes with imidazole, 51
specitation in the vanadate–alanylhistidine–peroxide system, 149
Vanadate
hydroxamido vanadates: aqueous chemistry and function in protein tyrosine phosphatases and cell cultures, 11
speciation in vanadium bioinorganic systems. 6. Speciation study of aqueous peroxovanadates, including complexes with imidazole, 51
density-functional study of vanadate-glycylserine isomers, 137
structural study of the interaction of vanadate with the ligand 1,2-dimethyl-3-hydroxy-4-pyridinone (Hdmpp) in aqueous solution, 177
Vanadate-dependent haloperoxidases
towards models of vanadate-dependent haloperoxidases: the hydroxyl side chain, 185
Vanadate oligomers
vanadate oligmer interactions with myosin, 141
vanadate oligomer inhibition of passive and active Ca^{2+} translocation by the Ca^{2+} pump of sarcoplasmic reticululm, 145
Vanadate phytase
biocatalytic and biomimetic oxidations with vanadium, 81
Vanadium
investigations of Amavadin, 17
insulin-like effects of vanadium: basic and clinical implications, 21
models for the active site of vanadium-dependent haloperoxidases: insight into the solution structure of peroxo vanadium compounds, 41
oxidation reactions catalyzed by vanadium chloroperoxidase from *Curvularia inaequalis*, 91
chemistry and insulin-like properties of vanadium(IV) and vanadium(V) compounds, 123
specitation in the vanadate–alanylhistidine–peroxide system, 149
the vanadium isotopic constitution of petroleum asphaltenes: La Luna Formation (Venezuela), 153
vanadium catalyzed reduction of dioxygen to hydrogen peroxide: an oscillating process, 191
Vanadium complexes
biocatalytic and biomimetic oxidations with vanadium, 81
Vanadium-containing haloperoxidases
N-Salicylidenehydrazides as versatile tridentate ligands for dioxovanadium(V) complexes, 181

Vanadium detoxification
oxovanadium(IV) and oxovanadium(V) complexes relevant to biological systems, 1
Vanadium-induced electron transfer
redox reactions via vanadium-induced electron transfer, 27
Vanadium metabolism
oxovanadium(IV) and oxovanadium(V) complexes relevant to biological systems, 1
Vanadium nitrogenase
vanadium nitrogenase, 133
Vanadium peroxo complexes
insulin mimesis of vanadium derivativres. Oxidation of cysteine by V(V) oxo diperoxo complexes, 173
Vanadium(V) complexes
N-Salicylidenehydrazides as versatile tridentate ligands for dioxovanadium(V) complexes, 181
Vanadium-sulfur ligation
vanadium nitrogenase, 133
Vanadyl
oxo-vanadium as a spin probe for the investigation of the metal coordination environment of imidazole glycerol phosphate dehydratase, 161
Vanadyl ion
vanadyl(IV) binding to mammalian ferritins. An EPR study aided by site-directed mutagenesis, 107
o-Vanillin
oxovanadium(IV) complexes with aromatic aldehydes, 35
VO(IV)-containing drugs
speciation of insulin-mimetic VO(IV)-containing drugs in blood serum, 65
VO^{2+}/Aspirin complex
synthesis, characterization and bioactivity of a new VO^{2+}/Aspirin complex, 169
